LEONORA A. ODUOR

Supply Chain Management | Procurement | Logistics & Transport | Inventory Control

Kisumu, Kenya • 0729 501 144 • leonoraoduor7@gmail.com

PROFILE

I am a Supply Chain professional with two years of hands-on experience across procurement, inventory management, logistics coordination, and supply chain auditing in both government institutions and private organizations in Kenya. I have worked across three levels of government and the private sector, which has given me a practical understanding of how supply chains operate under different regulatory environments. I hold a Diploma in Supply Chain Management. I take compliance seriously, and I am always looking for ways to make processes more efficient for both service providers and the organization.

WORK EXPERIENCE

Procurement Assistant (Volunteer Internship)

County Assembly of Siaya | May 2024 – Present

Note: The Supply Chain Auditor role (below) was a defined attachment within the Internal Audit Department during the same period, before fully transitioning into this procurement role.

- Manage receipts, issues, and day-to-day stores administration for a procurement office handling an estimated 50+ active suppliers.
- Maintain and regularly update the asset register, covering approximately 200+ assets on the Public Procurement Information Portal (PPIP).
- Process and track quotations and open tenders, ensuring all submissions meet statutory deadlines and documentation requirements.
- Conduct board of survey exercises for stock and fixed assets, producing formal survey reports for management review.
- Manage vendor communications and resolve supply queries, contributing to an improvement in average delivery lead times.

Supply Chain Auditor (Internal Audit Attachment)

County Assembly of Siaya | May 2024 – Sep 2024

- Audited procurement records across multiple departments, reviewing an estimated 3–4 audit cycles during the attachment period.
- Identified control weaknesses and compiled findings into structured audit reports submitted to the Senior Internal Auditor.
- Designed and recommended internal controls to reduce compliance risk and limit exposure to procurement fraud.

- Verified that previous audit recommendations had been implemented correctly, achieving a follow-up closure rate of approximately 80%.

Career note (Jan 2024 – Apr 2024): Following the conclusion of my Ministry of Interior internship, I spent this period actively job searching while continuing with my studies.

Supply Chain Management (Industrial Attachment)

Ministry of Interior & National Administration | May 2023 – Dec 2023

- Maintained and updated the pre-qualified supplier register, covering over 30 approved vendors across multiple categories.
- Coordinated logistics and supply tracking for national government construction projects in Siaya County, including Huduma Centre and Siaya Prisons.
- Assisted with end-to-end tender and quotation processes from notices and opening through to evaluation committee minutes.
- Uploaded tender and quotation invitations to the government procurement portal, ensuring timely and compliant posting.

Career note (Apr 2021 – May 2022): Following my role at Bridge Hotspot Services, I spent this period actively searching for opportunities aligned with my supply chain career path while preparing to enroll in formal academic training. I enrolled at Siaya National Polytechnic in May 2022.

Inventory Control Manager

Bridge Hotspot Services, Mombasa | Mar 2019 – Apr 2021

- Oversaw the full inventory cycle for a fast-moving stock environment in the three sections; cyber café, car wash and their restaurant, managing an estimated KES 1M+ in stock value across multiple product categories.
- Designed and implemented an inventory control system aligned with public sector procedures, resulting in a measurable reduction in stock discrepancies.
- Ran monthly stock counts that reduced reconciliation variances by an estimated 30% over the first year of implementation.
- Set and reviewed reorder levels, buffer stock quantities, and maximum holding levels to prevent both stock outs and overstocking.
- Monitored and reported on inventory-related costs; holding, ordering, and handling costs identifying savings opportunities for management.

EDUCATION & PROFESSIONAL QUALIFICATIONS

Diploma in Supply Chain Management- Siaya Institute of Technology | May 2022 – Mar 2025

Pursued while completing professional Industrial Attachments reflecting my ability to manage academic and work commitments simultaneously.

Data Science- Mediacrest Digital | Jan 2026 – Mar 2026

Intensive program delivered entirely in Python, covering: Data Structures & Algorithms, Data Cleaning & Exploratory Data Analysis (EDA) using Pandas, Data Visualization, Statistics in Data Science, Machine Learning fundamentals, and version control using GitHub. These skills directly strengthen my ability to analyze procurement data, identify trends, and produce evidence-based supply chain reports.
